

## Neutrakon ® SN90 neutralization system

for neutralization (pH value increase above 6.5) of acidic exhaust gas and condensate from large plants up to 11 MW.

The individual Neutra baskets make maintenance much easier. The system, which is protected by a utility model, optimizes the flow behavior through the perforation matrix.

Stainless steel version type V4A

With ball valve for easy maintenance

### Technical data:

Suitable for acid condensates for large heating systems, CHP or chimneys up to 11 MW

Condensate volume flow : 1500 l/h

2 inlets with the possibility of combining different condensate flows

Inlet connection: 1 ¼ "

Drain connection: 1 ½ "

Maintenance tap: 1"

Inlet height: 125 mm

Drain height: 210 mm

Dimensions in mm ( LxWxH ): 1137 mm x 350 mm x 402 mm

Installation dimensions in mm ( LxWxH ): **1185 mm x 450 mm x 402 mm**

Weight including packaging: 160 kg

### System design:

1 neutralization system with connections in stainless steel 4VA

3 Neutra baskets with special perforation matrix in stainless steel 4VA

90 kg granulate Neutrakon® GS

1 Operating instructions

1 maintenance sticker/booklet

Manufacturer: Mommertz GmbH

Art.-No.: 097000
